

ASWINI V S

Kanyakumari, Tamil Nadu | vijisaswini@gmail.com | 9342577163

PORTFOLIO: <https://admirable-pegasus-1ffe2b.netlify.app/> | LINKEDIN: <https://www.linkedin.com/in/aswiniivs>

PROFESSIONAL SUMMARY

Enthusiastic Computer Science graduate with strong interest in software development and machine learning. Built real-world projects including a soil pollution detection system and a weather-based farming web app. Completed internships in Deep Learning and Java development. Seeking an entry-level role in software development or ML to contribute and grow in a dynamic and technology-driven organization.

TECHNICAL SKILLS

Languages: Java, JavaScript

Web Technologies: HTML, CSS, Bootstrap, jQuery, React.js

Tools: GitHub, VS Code

Education

BE - Computer Science and Engineering, 2026

Amrita College of Engineering and Technology, Nagercoil, Tamil Nadu | CGPA: 8.29

HSC, 2022

Christuraja Matriculation Higher Secondary School, Marthandam, Tamil Nadu | 83.6%

SSLC, 2020

Christuraja Matriculation Higher Secondary School, Marthandam, Tamil Nadu | 77.4%

Internships

Deep Learning Intern — CITD (MSME), Chennai

09 JUL 2025 - 23 JUL 2025

- Implemented Neural Network and CNN models for image-based classification tasks.
- Trained and evaluated AI models using Python and deep learning frameworks.

Java Intern — Srishti Innovative Computer Systems, Trivandrum

04 MAR 2024 - 09 MAR 2024

- Developed Java-based modules applying OOP principles and data structures.
- Built small-scale applications to practice real-world Java development workflows.

Projects

Phytoremediation Plant Selection System

- Built an IoT system using ESP32 to monitor soil pH, temperature, and moisture in real time.
- Trained an ML model to detect soil pollution levels and recommend suitable plants.
- Integrated sensor data with cloud storage and a web-based dashboard.

Tech Stack: Python, ML, IoT, HTML, CSS, JavaScript

SkyCast

- Developed a real-time responsive web application using HTML, CSS, and JavaScript with weather API integration.
- It enables users to search for any city and instantly view current weather information including temperature, humidity, wind speed and weather conditions.

Certifications

- JavaScript Course – Udemy
- Data Analytics with Python – NPTEL (IIT Roorkee)
